

TRICO® NuVision

TRICO®

TRICO NuVision blade assemblies are finished in black powder coat and feature stainless steel support rails for greater rigidity. Installation is simple and fast; adaptors are supplied to suit the blade-to-arm configuration for the majority of popular passenger cars and light commercial vehicles on Australian roads.

Designed with the budget conscious consumer in mind, NuVision wiper blades feature good performance characteristics at a very affordable price. An aerodynamic design and the utilisation of multiple pressure points provide quiet, even, streak free operation.

SPECIFICATIONS

- Steel frame
- Powder coated finish
- Composite compound rubber element
- Stainless steel support rails
